| PROFILE                                  | Senior Software Engineer with 8+ years of experience building large-scale distributed systems and AI-powered data platforms at Microsoft and Amazon. Proven record of delivering highly available solutions handling 100M+ requests/min, driving \$18M+ annual savings. Skilled in cloud-native architectures (AWS & Azure), big data engineering, and mentoring engineering teams.                                                                                                                                                                                                                                                                  |            |

2016

Software Engineer - Intern, **CS Soft Solutions**

Chandigarh

- Developed a Web Application that automates the college functionalities like Fees, Attendance Management and many more. Developed within the team of 2.
- Daily Responsibilities : Code implementation(100%).

#### **CERTIFICATIONS**

- Data Science and Machine learning at Stanford University.
- Data Science and Machine Learning Bootcamp.
- AWS Certified Developer – Associate [CertLink](#)
